                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                also called Jacobs syndrome. CACP is an autosomal recession disorder. Individuals with CACP have normal appearing joints at birth but with advancing age develop joint failure associated with noninflammatory synoviocyte hyperplasia and subintimal fibrosis of the synovial capsule.

MISCELLANEOUS: Different forms of various molecular weight have miscellaneous are possibly due to different levels of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      been observed. Such forms are possibly due to diffe glycosylation and protein cleavage (By similarity). SIMILARITY: Contains 2 hemopexin-like domains. SIMILARITY: Contains 2 SMB (somatomedin B) domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1171

May regulate nociceptor function and/or development, including the sensation or modulation of pain.
-I- SUBCELLULAR LOCATION: Membrane; multi-pass membrane protein.
-I- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            STRAIN=C57BL/6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Cell 106:619-632(2001).

Patent No. 6309877

GENERAL INFORMATION:

APPLICANT: Chau, Raymond M. W.

TITLE OF INVENTION: Isolation and Use of Mot
FILE REFERENCE: 12592-2

CURRENT APPLICATION NUMBER: US/08/928,862

CURRENT FILING DATE: 1997-09-12

NUMBER OF SEQ ID NOS: 5

SOPTWARE: PatentIN Ver. 2.0

SEQ ID NO 4

LENGTH: 33

TYPE: PRT

ORGANISM: Homo sapiens

US-08-928-862-4
